SHIPPING CHARGES & OTHER INFO

NEW 48-52 CATALOG!!!!

We are excited to now offer parts for 48-52 trucksl! But please be aware that we are still learning about these trucks, and parts listed in this catalog might change as we learn new things about them. So please check with us if you have any questions.

CORE CHARGES

We chrome or rebuild some original pieces which means we must exchange stock parts for the chromed or rebuilt part. Core charge will be refunded as soon as we receive your chrome-able or rebuild-able part. It MUST be in acceptable condition. **CORE CHARGES** Listed in this catalog are NOT an estimate of value. They are an **INCENTIVE** (scare tactic perhaps) for the return of the original part. Core charges are in **ADDITION** to the price of the product. Parts like steering boxes have a low value ($25.00 for instance) but a high Core Charge ($100.00) because they are difficult to return, heavy, messy, etc.

INSTRUCTIONS FOR RETURNING YOUR CORES:

Make sure your name, address and phone number is inside the box

STEERING BOX CORES, cut the shaft off 2" above box, drain oil, wrap in plastic (oil is never completely gone) send without shaft, then box is only about a square foot. Steering boxes must have the outer plate, insides are not necessary as we discard them.

SEND CORE PART TO: MID FIFTY F-100 PARTS
5221 US HIGHWAY 68
GOLDEN VALLEY, AZ 86413

Please include your Core Charge Invoice Number.

The post office has a flat rate box that goes for about $12.00 that is perfect for the steering box. Wrap in plastic first, post office goes postal if boxes are leaking! Unacceptable cores will cannot be returned, unless shipping prepaid.

DUE TO COST OF HANDLING & STORAGE UNACCEPTABLE PARTS WE RECEIVE MUST BE DISCARDED.

If you are lucky enough to have extras, let us know, we may buy them from you.

SHIPPING

Shipping costs are calculated based on your location and the size/weight of your order and we charge as close as possible to our cost to give you the best possible rate. Next Day, 2 and 3 day shipping is available for an additional charge. We are committed to the environment and hate to waste good boxes so you may receive your parts in a recycled box, the image on the outside may not be what is inside.

RUSH ORDERS

Rush service is available on most items and is an extra $20. Rush orders must be placed by 11AM Arizona time, and does not mean you are paying for a faster shipping method, it just means your order will ship the same day if received before the cutoff time

COD

We accept COD orders and all major charge cards, cash is nice too.

TRUCK FREIGHT

Truck lines charge $20.00 to call before delivery, a minimum of $90.00 to $180.00 to deliver to a residence, so we need a business address. Some locations are remote, and extra charges might apply. Never ship by Truck COD (as in collecting for item at delivery, truck lines charge hundreds of dollars to collect other people's money). UPS cod is much less, about $10.00 at time of printing. NEVER accept a truck freight shipment without examining it closely first, OPEN it up to inspect for hidden damage If you have any questions, or notice any damage, WRITE IT ON THE BILL OF LADING, ask the driver to wait and CALL US!! 1-800-252-1956. Do not be intimidated, you do not have to accept a questionable shipment! Common sense must be your guide, Shipping companies assume when they deliver something to you it is your responsibility. If you accept a damaged shipment without inspecting inside and out, and writing any damage on the bill of lading there is NOTHING WE CAN DO!!!! If someone else is accepting your shipment, make sure they NOTE ANY DAMAGE ON THE BILL OF LADING, if they do not, THERE IS NO RECOURSE. Accepting a freight shipment is YOUR RESPONSIBILITY

PHONES

Our phones are toll free to you for both ordering and technical questions. We do NOT have automated menu driven mail box phone systems and we NEVER will, 'cause I hate them. We try to spend as much time as needed with each caller, therefore you may get a busy signal or recording during business hours. Just give us a few minutes and try again. Our phones are answered by living, breathing, interested and helpful people. If we are unable to help, most likely we know someone who can and will refer you.

FIRST-SERVE WAITING LIST

New parts, improved parts, new fixes, ideas and such are being worked on every day. Some are listed in this catalog or on our website. If you are interested in one, or any part for that matter, let us know. We will keep your name on a waiting list and notify you when it becomes available. There is NEVER an obligation to purchase of course.

We stock, and/or are dealers for any and all manufactures of any F-100 product, as well as our own. We ship what Sy considers best at any given time, we research this stuff constantly, what we consider best sometimes changes. Rubber compounds change, Stampings change, molds & dies age and need constant care, manufacturing can be off just because one person is off. If you have a question, information or a preference, give us a call.

JUST A FEW, Many colors not shown, Ask for FREE SAMPLES. The colors here are just to get your creative juices flowing as it is not possible to accurately reproduce fabric colors on paper, so call for a real sample before you do anything wild. Even blacks and grays have variations. If in doubt we are happy to help. Original fabric is expensive, Check current price, last was $95.00 yard! Keep in mind you may be a teensy bit color blind, please, let one of us, or another favorite lady, help with color matching.

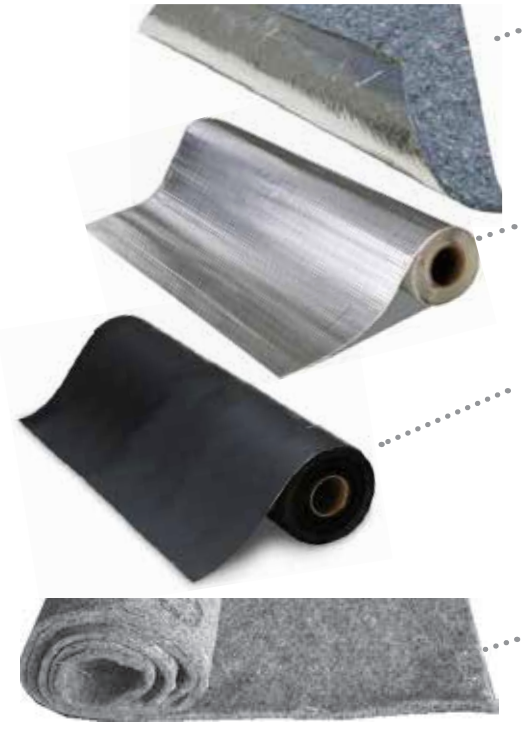
INSULATION, DIY

INSULATION INFO: Many aluminum faced insulation instructions show the aluminum side facing the steel and the product used inside doors, this is misleading. The Shiny side should always be facing you, with the insulation material between it and the metal to form a barrier. Never use this type of insulation inside doors as it will retain moisture.
GLUE: We prefer high temp glue on most areas as summer surface temperatures on floor, roof and firewall can easily reach the normal 160° "release" temperature of standard glues.



HEAT SHIELD & INSULATOR
Aluminum laminated to 3/8" fiber tech padding, (do not use inside doors, is not water proof) precut kits are made from this material. Apply with high temp glue and seal all seams with aluminum tape. Usually need 3-4 rolls of insulation, 2 tape & 2 glue for complete cab

Single sided foil, 48" x 72" rolls..... 2167 ..... $32.00 rl
Double sided, 48" x 72" ..... 2167-AA ..... $35.00 rl

SELF ADHESIVE SOUND & HEAT DAMPER
Heat reflective, waterproof, mold-able, self adhesive. Good for any place that might get wet, inside doors, etc. High density, use in indents or sheet metal areas to dampen vibrations.

36" x 48" ..... 2166 ..... $38.00 rl
18" x 32" ..... 2166-D12 ..... $28.50 ea

OVERDONE MAT
Super dense self adhesive matting. This is stuff I like to go over all the sheet metal with, on top of indent fillers but under jute insulation. Stick it down and heat it up, contours perfect. Completely quiets cab.

Roll 36" x 48" ..... 2166-B ..... $22.00 ea

FIBERGLASS MAT SELF ADHESIVE INSULATION
Bright foil side acts as temperature barrier, inner quarter inch fiberglass mat as sound deadener, fiberglass will not absorb water like fiber filled, self adhesive. Easy to install. 40" x 96" roll ..... 2168 ..... $32.50 rl

HORSE HAIR JUTE INSULATION ..... 2132-JT ..... $19.95 rl
Yucky stuff but originally used under floor mat

PATTERN KIT *Cut the insulation out yourself with our patterns.*
Lower cab, floor, rear wall & kicks ..... B-2110-4852 ..... $35.00 kit
Headliner ..... B-2116-4852 ..... $35.00 kit

12v Complete ..... 3263-4852 ..... $395.00 ea

Ford Powered Roadster owners and Rodders with the need for only a simple electrical system will love this model. We don't use an old GM fuse block and call it universal. We do it right. This kit has 8 fuses and 10 circuits and plenty of wire needed to take care of your basic engine, dash and lighting, gauges and some accessories yet built well enough to be compatible with electronic fuel injection. This panel measures only 7-1/2L x 3-1/8W x 2-7/8H!

6 VOLT WIRING / ELECTRICAL

THIS PAGE IS FOR 6 VOLT TRUCKS ONLY, IF YOU ARE LOOKING AT 6 VOLT AND ARE UNDECIDED, ANSWER THIS QUESTION:
Are you striving for exact, or as close to exact of original as possible? NO? Then don't even mess with 6v, go 12v.
The following pieces are cloth bound, proper color, correct wire size and include instructions.
6 VOLT TO 12 VOLT SYSTEMS. Changing to 12 volt will require a 12 volt generator or alternator (alternator is best choice). The bulbs need changed to 12 volt. Stock gauges, 6v heater motor and 6v wiper motors will work with an electronic voltage reducer. 6v starter will run a little fast and maybe not last as long so may not be worth changing. Battery, solenoid, & coil need updated.

UNDERBED TANKS

All our tanks have these features:

- Choice of fill port in bed wood or under a trap door.
- Fill is located in center of third board from driver side.
- Sender holes are pre-drilled and positioned for proper float location.
- Vent fitting accepts in-tank roll over vent or fitting for remote style, and is located under same board.
- Choice of crossmember mount or frame mount step down tank.
- Easy to install mounting nuts are included.

Gas filter and hose connectors are needed to protect tank from contaminants entering through open vent. The in-tank vent and filter kit is included in all the complete kits below

AIR CONDITIONING KIT

Q&A DIFFERENCES IN AIR CONDITIONING KITS:

- OLD AIR is somewhat easier to install in original location.
- OLD AIR leaves more glove box, VINTAGE AIR includes small, about 2 1/2" glove box.
- VINTAGE AIR comes with underdash black plastic panel, some like it, some hate it, no discount without it. Oval switch panel and round louvers will not fit in it, they will fit in x-tend-a-dash though
- OLD AIR unit shows a little more but looks more like stock heater.
- DRYER is mounted on condenser in VINTAGE AIR KIT, Dryer can be mounted separately with OLD AIR KIT.
- BOTH KITS are set up for 134a refrigerant, R12 is available, just ask but you do not want it. Refrigerant is not included.
- VINTAGE AIR "servo" switches are not compatible with OLD AIR UNITS, use OLD AIR electric controls. ADD-ACE
- FOR A STOCK LOOK, use rotary switches with stock knobs in the dash, hide louvers under the dash.
- VENTS, prices listed are for each vent, same price by itself or with kit. Kits come with plastic non-directional vents. Keep in mind if you want directional and/or close-able vents, often you might or might not want cold air blowing on you.

OLD AIR KITS

This unit is easy to install, mounts in original heater holes, lines can exit through original motor hole, includes grommet, or go through kick panel for a clean firewall. Automatic dehumidified defrost.

All radiators are pressure tested and guaranteed for a full year. Radiator shipping is oversize. Use an electric fan unless going for as close to original as possible as when we are in traffic, or parades we are running close to idle and need the fan the most. Radiators on this page need around a 7-lb cap. You should never go over a 14-16 lb cap on any of these radiators. If you need more than that the problem is not with the radiator. Most engines should run 180-210 degrees. Shrouds, are needed most of the time to direct air “through” the radiator, otherwise you are only using half of it. Air also has to exit which is why our shrouds have exit holes.

OUR GLASS is sanded and buffed to a fine smooth rounded edge, tempered for strength and safety. Unconditionally guaranteed to fit and arrive in one piece. We do not use "laminated" glass as the quality of laminate has deteriorated (bubbles, breakage) tempered glass is safer and stronger, if you prefer laminate, ask. Original glass was laminated, use only if going exact of original. We can supply it even with original licensed logo "bug" extra bucks of course!

BUTYL WINDOW SEALER ..... 3126 ..... $9.95 ea
Seals rubber correctly, Windex or soap up a razor blade & rag, run Butyl around weatherstrip, between rubber and glass & wipe immediately for clean seal. We do not advise using new silicone or adhesive type windshield sealers.

PLASTIC RAZOR BLADE ..... 80106 ..... $1.65 set
Set of 5. Handy for putting on window sealer, see above, instant "finger-nail". One of Sy's favorite things

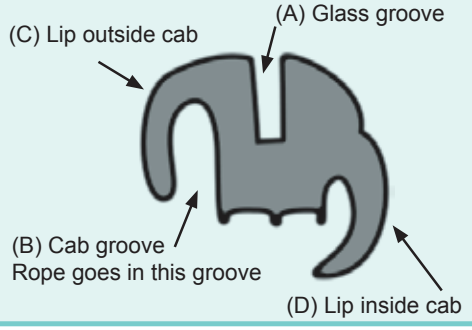
WINDOW INSTALL ROPE ..... 3124 ..... $15.95 kit
What a help, tool feeds correct size rope into rubber groove

WINDOW GLASS HOLDER SUCTION CUPS
Another handy tool, for holding glass up while you work inside the door ..... 1742-GH ..... $16.90 set

WINDOW INSTALL TOOL KIT ..... 93126 ..... $25.00 kit
Includes window rope tool, butyl sealer, plastic razor blade and rubber gloves

STANDARD REAR WINDOW

Please read this! Rubber looks like this



- The rubber is the same all around, there are no corners
- The glass is larger than the opening
- The glass is installed from INSIDE of truck
- You are pulling rope from OUTSIDE of truck (B)
- The larger part of the rubber (D) goes INSIDE truck
- The smaller part of rubber (C) goes OUTSIDE truck

If you install it backwards, then call and tell us there is something wrong with rubber or that glass is too big for hole, etc well then... We know you did not read the directions, and, you owe us lunch. If you are a professional glass installer, we will be expecting dinner

Wrap around rear window installs like windshield, both are installed from outside of truck. In this order; rubber on glass, trim in rubber, entire assembly into truck

DOOR WEATHERSEALS

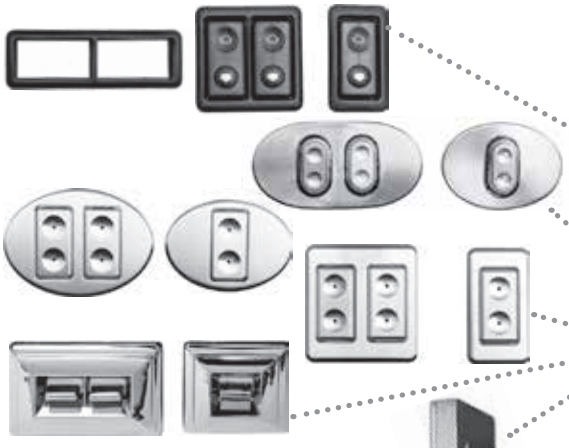
POWER WINDOWS



SWITCH CHOICES

I don't like the switches that normally come in power window kits, they have a little picture of a car window, and passenger side is backwards for heavens sake!! Therefore our power window kits are priced without switches, add switch kit of your choice below, includes & 3 switches

Black switches, illuminated, bmw style
- Illuminated, set ..... 1744-AR ..... $159.00 set
- Illuminated, one only ..... 1744-A1 ..... $20.00 ea

Billet oval switches
- Non-illuminated ..... 1743-OV ..... $185.00 set

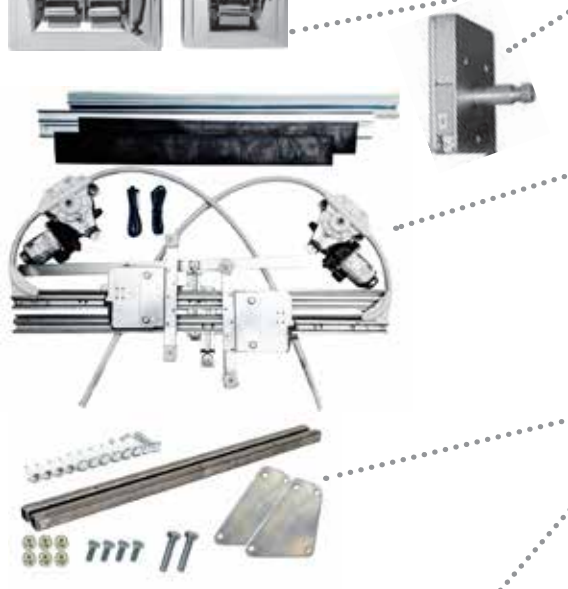
Billet rectangular Illuminated ..... 1743-RLT ..... $218.00 set

Chrome, GM style, non-illuminated ..... 1744-CH ..... $159.00 set

Handle shaft style ..... 1748-USA ..... $269.00 pr
Uses stock handle as switch, wiring diagram included. Both sides.



POWER WINDOW KIT

Power window kit with clamp kit ..... 1740-E ..... $285.00 kit

Power window kit with channel lift ..... 1740-EX ..... $298.50 kit

Power window install kit

Kit includes heavy duty cross bars to hang motor on, correct spacers, hardware & instructions. Makes installation a snap. No power window kits have long or strong enough motor mounting bars, and finding correct metric bolts is a pain. Sy's kit is made to install 1740 power windows but works with most we have tried.

- Install kit does both sides ..... 1737 ..... $38.50 kit
- Just the Metric bolts and spacers ..... 81737 ..... $7.50 kit

Specialty power window kit ..... 1739 ..... $395.00 kit
Cable driven. Includes black switches, double for driver and single for passenger, stainless flexible door jam wire conduits and video instructions. Widely advertised, nice instructions, no install kit or switch choices. Nice kit, but same $$ would get kit above with fancy billet switches plus the easy install kit, and all with same warranty.

Auto express module ..... 1745-EX ..... $35.00 kit
Use with any switch set, runs driver window all the way down with touch of button just like today's cars

Suction cups ..... 1742-GH ..... $16.90 set
Holds window up while you work on the door.

POWER WINDOW REGULATORS

New power window regulators go right back in stock location. Mount up with stock bolts, and use stock window lifts. Too easy!! Order choice of switches above, handle shaft will not work. Can not be used with solid side windows as the regulator and motor are located under the vent window area.

For with vent windows ..... 1742-4852 ..... $545.00 pr

Solid side windows ..... 1742-4852S ..... $565.00 pr

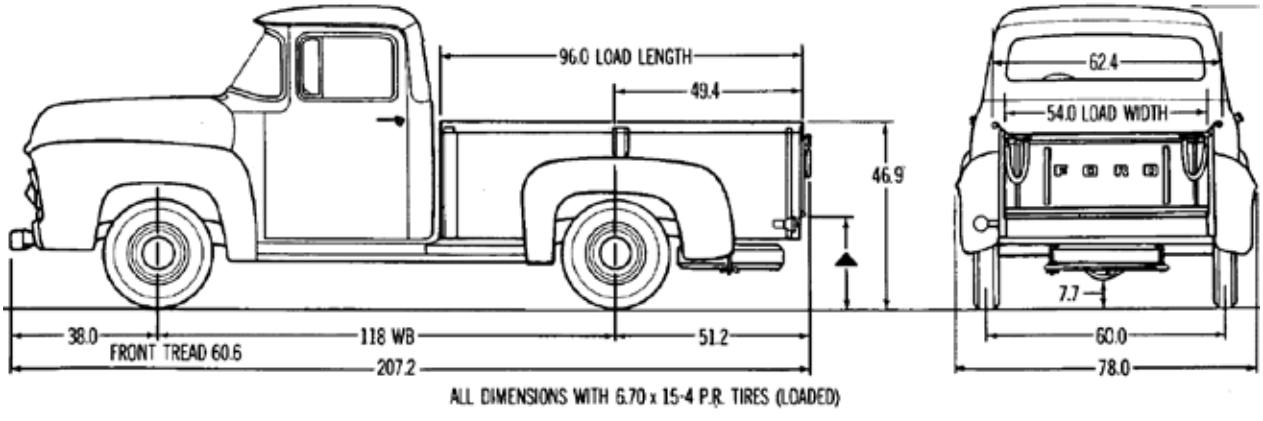
LONG BED PARTS

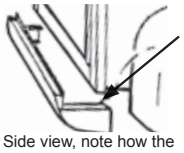
LONG BED SECTION 8 FOOT BED

If you are interested in complete long bed kits, or long bed pieces please call us to check if they are available.

Long beds fit 118” wheel base trucks. The F-100 long bed has 5 lug wheels and the same springs as the short bed F-100. Up until 1956 long beds were installed on 118” wheelbase F-250 Trucks. Long beds fit 1951-1980 F-250’s as well with some crossmember and fender bolt changes. Note the dimensions from a 1956 below. We offer some custom updates to the bed and even a long version of the standard short bed. (Confused yet?) If you have any questions please give us a call.



ROLL PANS



Side view, note how the extended pan comes out under the gate, while all rounded pans are flush with the stock bed sill.

Goes under gate over rear x-member under extension, not quite to bottom of rear fender.

Toyota Steering conversion is a very simple and nice set up if done properly. Articles have been written and installations done using the ford pitman arm by squeezing it down on the Toyota sector shaft, literally smashing the splines together. Splines do not match. DO NOT INSTALL YOUR STEERING IN THIS MANNER!!!!! Call us for any help or explanations, don't believe everything you read, unless you read it here, of course!

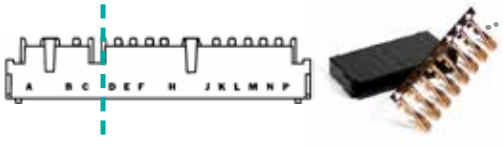
IDIDIT STEERING COLUMNS



Beautiful column with 5 position tilt, self-canceling turn signals, 4 way flashes, horn, standard GM wiring harness & dress up kit with aluminum knobs and chrome levers. Includes horn and turn signal plugs. Columns accept 1969-up GM steering wheels or most any adapter available. Straight columns (no tilt) are available at 50 bucks less, not shown here. Columns listed do not accept stock steering wheel. To use stock Ford wheel order 4710-(finish) turn-signal switch not ready yet, Ken is working on it.

We suggest a 30" column length with a 4 1/2" drop. However, all lengths are available, just add length to part number.

DISC BRAKE KITS

A word about brakes, there are disc kits, power booster, kits for IFS, front kits, rear kits, bolt on, weld on and, who knows what on, kits. The kit for your truck depends on what you want to do with the truck, how fancy, how pricey, how easy to install, what wheels, what front end, what rear end, what modifications, who's driving, how often, how far, etc. We are happy to help find just the right combination or an expert in the brake & suspension field for any information or help you may need.
