

DISC BRAKE KITS

A word about brakes, There are Disc Kits, Power Booster Kits, kits for IFS, Front Kits, Rear Kits, Bolt on, Weld on and, who knows what on, Kits. The kit for your truck depends on what you want to do with the truck, how fancy, how pricey, how easy to install, what wheels, what front end, what rear end, what modifications, who's driving, how often, how far, etc. We are happy to help find just the right combination or an expert in the brake & suspension field for any information or help you may need.

Please keep in mind this truck weighs over a ton and a half, it is Top Heavy & Front Heavy. Get as much weight behind the front axle as possible.

Reconsider Sway Bars, Seat Belts and Forward springs.
