

## Pg 181, 2012

We offer only Stock Style wheels. Shown below dressed with hub cap and beauty ring. 1953-54 wheels were painted to match truck, in 1955 they were Snow Shoe White and 1956 they were Colonial White. (both colors were somewhat off white toward cream) (all F-250 wheels in all years were black) Stock wheels are 15", 5" wide with a bolt pattern of 5 1/2" and backspace of 3". (our 1355-30S) We suggest for most trucks that are not "exact of original" but want the original look, a 6" or 7" wheel might be a better choice. We now offer the stock wheel in both the original 5 on 5 1/2" bolt circle and in a multi-size bolt circle for 5 on 4 1/2" and 5 on 4 3/4" With these choices you can run a stock wheel on most any rear end or front end conversion.

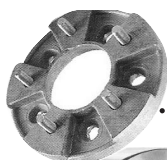

**NEW 16" & 17" WHEELS NOW AVAILABLE**  
**17" wheels, call for quote, Neat but Pricey!**

Wheels over 8" wide SPECIAL ORDER non returnable

**WHEEL TUBS FOR BED SEE PAGE 121 & 182**

**LUG NUT CUPPED WASHER**  
for worn wheels, Set of 5, does  
one wheel... 1309-CW.....\$4.95

## WHEEL BOLT PATTERNS

1953-56 Truck . . . . .	.5 x 5 1/2
Ford car, later truck . .	.5 x 4 1/2
Chevy wheels . . . . .	.5 x 4 3/4
Some Other GM . . . . .	.5 x 5
Aspen, Volare, etc . . .	.5 x 4 1/2

**BOLT CIRCLE MEASUREMENTS.** Every place you look there is yet another way to measure bolt circles, all we do is the truck, it has a 5 lug pattern. So measure from center of one lug, skip a lug, to center of next lug and add 1/4". Works every time. If you have trouble call for a handy dandy template, no charge. templet can not be faxed or e-mailed

**BACK SPACE:** This only comes into play when you have changed an axle, want wider wheels and need more or less room. Keep in mind wheel size is smaller than tire size (the cross section or widest point) which is the first number in tire markings. Example tire 225/60R15 is 225 millimeters wide or about 8 7/8". The second number is a percent of the first, meaning the larger the number the taller the tire, or this tire is 60% as tall as it is wide or about 5 1/3"

**15" WHEELS With 5 on 5 1/2" BOLT PATTERN**

Part #	Width	Bolt Pattern	Rear Spacing	Plain Steel	Coated or Chrome
1355-30	5"	5 1/2	2.75"	\$80.00	\$110.00
1356-37	6"	5 1/2	3 3/4 "	\$80.00	\$110.00
1357-37	7"	5 1/2	3 3/4 "	\$85.00	\$120.00
1357-40	7"	5 1/2	4 "	\$85.00	\$120.00
