

ABOUT OUR UNDERBED TANKS

TANKS HAVE NEW DESIGNS, NEWEST TANK MOUNTS TO FRAME X-MEMBERS

Our underbed Tanks are made specifically for 1953-56 F-100 frame and bed floor, 'cause that's what we do, however, most will fit 48 thru 64. The fill port is positioned to come up in the center of the third board on the driver side. They all have pickup and return ports, a vent port, pre-drilled sender location, 2" fill port, correct flanges & hardware. Intended for stock frames, may not clear modifications such as 4 bar set-ups, pro-street or coil-overs.

All our tanks have these features

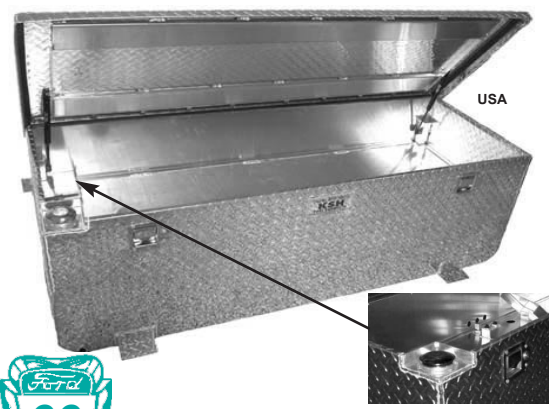

- 2" Fill bung so it can accept any fill port available
- Side fill available, run fill between frame rail and bed
- Screw on trap door cap, cap need not be removed to fill, handy trap door.
- Fill is located in center of third board from driver side
- Sender hole is pre-drilled and holes are positioned for proper location of float.
- Vent fitting accepts In-tank roll over vent or fitting for remote style, and is located under same board.
- CHOICE OF: Flanges fit stock x-members, or, Frame mount flanges, can be trimmed to accept spring perch and are angled to fit frame.
- Easy to install mounting nuts are included.

Tank has both gas line and return line

Gas filter and hose connectors are needed to protect tank from contaminants entering through open vent. Tanks are set up for in-tank vent 1640. If using remote vent 1641, you will need install kit 1641-K The In-Tank vent and filter kit is included in all the kits on the next page.

- GAS LINE, see page 64 & 5

IN-BED DIAMOND PLATE TANK AND TOOLBOX TANK COMBO

Made of .125 aluminum diamond plate. Two baffles to control fuel sloshing and to provide added stability. Tool Box-Tank Combo has a key with double lock that allows you to secure tool box section and fuel fill. Front of unit is one piece for a nice clean line, division between toolbox and fuel tank does not show. Fill for fuel tank is located in corner of toolbox where it is easy to use but can be secured when lid is closed and locked. Either tank can be used as main tank or as an auxiliary tank. Ready for sending unit to match any gauge, includes pick-up tube, fill port cap, return line & vent fittings.
