

AIR CONDITIONING, VINTAGE AIR STYLES

Vintage air units go through firewall, For clean firewall (kick panel exit) hard lines must be removed and replaced with rubber hoses.

Oval controls will not fit in Vintage Air plastic underdash panel, but will fit in any of our extensions see pages 114 & 170

CUSTOM KICK PANELS WITH AC LOUVERS AVAILABLE, see PAGE 20

VINTAGE AIR KITS, New Gen II technology, means unit is smaller but more powerful with servo (electric not vacuum) motors to control all air-flow doors, and bi-level operation, (mixes heat and air for better dehumidified defrost and temperature control). Includes plastic underdash piece for louvers and/or controls. Note we also have a fiberglass extend-a-dash for a more custom look.

NOTE: INSIDES KIT (Evaporator Unit) can be ordered alone, or add UNDER HOOD kit for a total AC kit. Add prices for total price. UNDER HOOD KIT **CAN NOT** be ordered WITHOUT INSIDES KIT.

INSIDES KIT, (EVAPORATOR KIT) Includes Unit & Mounting Brackets, Control Switches & Wiring, Duct Hose & Drain Kit, Water Valve, Reduced Glove Box and Plastic Underdash Panel. Lines exit firewall in original heater motor hole.

WITH **ROTARY SWITCHES**, for dash or underdash panel without holes, not shown.

1953-55	5203-5355	\$598.00
1956	5203-56	\$598.00

WITH **4 LEVER HORIZONTAL ELECTRIC CONTROL** in Plastic Underdash Panel

1953-55	5202-5355	\$595.00
1956	5202-56	\$595.00
