ABS REDUCED GLOVE BOX, New, Sy's deeper box with correct front edge for easy mounting about 3.5" deep. Use with AC
 1953-55,1024-M5355\$25.00 ea
 1956,1024-M56\$25.00 ea

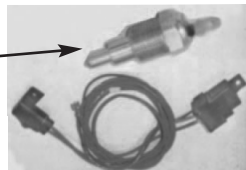

BOX REDUCING CLIPS & SCREWS81025\$5.00 kit
 Take about 3" off any stock style cardboard box, leaving about 7" of usable glove box, install clips and mount like original. Or needed if you bought box elsewhere and discovered it came with no clips.

ADJUSTABLE SWITCH.

CABLE CONTROLLED "Y" hose connector. . .1954\$20.00 ea.

WATER probe goes in hose
ENGINE sensor goes in block

ELECTRIC FAN SENSOR & WIRING KIT includes Wire harness, sensor, fan relay, fuse & connectors. Not exactly as shown, old pictures
 BY WATER Temp Adjustable5036\$49.95
 BY ENGINE Temp range ON*190, OFF-1705038\$49.95
 BY ENGINE Temp 195, for fuel injected eng. . . .5038-195\$58.50

ELECTRIC FAN A/C COMPRESSOR CLUTCH WIRING KIT
 Protects with air conditioning, works in conjunction with water temp kit. Operates fan when compressor clutch engaged, includes wire harness, relay, fuse and connectors.5037\$45.00

Compressor wiring kit 5037 plugs into Block temp harness 5038 for ease of installation and maximum protection of ac system.

MORE FAN MOUNTING SHROUDS, SEE PG 79

16" SUPERFLO FAN5031\$110.00 ea.
 Ball bearing driven with aluminum motor housing to dissipate heat, reversible, push or pull. Mounts in shroud or on radiator, best one we have found. Width 16-3/4", Thickness 3-7/8", Blades 15-1/4"

FAN MOUNTING BOLTS, use without feet . .85033\$5.00 kit
ATTACHING FEET (6 pcs)5031-FT\$6.50 set
FAN BUMPERS, rubber85034\$2.50 set

FAN MOUNTING PULL STRAP KIT, goes through core, not needed. with custom radiator shrouds5035\$6.95 kit

Fan manufactures claim all kinds of crazy numbers, we are watching and checking quality constantly. If you are confused just ask for help.

FAN ATTACHING BRACKETS5033\$69.95 pr
 Fits Stock Style Radiator, Includes all Mounting hardware, Brushed Stainless. Can be trimmed to fit many other radiators 1948-60

Shrouds, if you need more cooling a shroud is often the answer, see next page for many choices.

For proper cooling, air must be directed, moved and expelled. Do Not use a pusher fan, ineffective at moving air.

easy to install, works & looks great, no air back-up, great for highway driving
