 Hinges1549\$75.00 pr

DIY, simple L bracket, mount to air deflector area, bolt sheet metal together, hinge to frame

COWL VENT

COWL VENT HINGES

Poorly fitting cowl vent? Is often just hinges, they are a little flimsy, held on by tack welds, and take a lot of abuse. Sometimes just easier to put new ones on.

COWL VENT REPAIR SCREEN

0904\$25.00 ea

Repair your torn screen with new piece, comes with pattern

COWL VENT RUBBER SEAL

0902\$9.50 ea
Cowl vent seal installation, remove cowl vent, clean seal lip, Use even layer of good weatherstrip adhesive, (our #3125 or 3m cement, clamp down until set, clothespins are handy. Cowl vent can be adjusted both at the hinge screw point and most importantly at handle support bracket. To adjust, shift vent in elongated holes, if additional adjustment is necessary gently bend the cowl hinge arms. I said gently. Weather-seal is bear to install, it fits but you'll swear it doesn't.

COWL VENT PATCH PANEL

Eliminating your cowl vent, here is a handy patch panel to weld in, then send in your old cowl vent and handle assembly for credit, amount depends on how much you send in.
