

BED FLOOR

HIDDEN MOUNTING EXPLANATION: Shown is stock mounting bolt at front of bed. Note bed strip has an extra mounting hole for mounting bolt. This is eliminated when using "hidden mounting". Bed is secured to frame from underneath with bolt (C) coming up through bracket (B) into hidden mounting crossmember (0230-HD) which has a tap instead of the sleeve (A). Center x-members (0232-HD) also have threads welded inside, bolt goes through frame from underneath into threads. Wood sets on top of front bed panel flange, under side flanges.

- A.) Front crossmember sleeve
- B.) Frame brackets
- C.) Hidden mounting bolt

Bed wood goes over flange of front panel, under flange of bed sides.

Note we do not indent ends of bed wood. We like the look better with end cap over bed flange instead of under, it is more level with strips and eliminates that dust catching crack. Grind down bed flange a tiny bit if you need to push the cap back to clear gate. If you just must have original, ask for end rout, add \$20.00.

BED WOOD KIT

Clear red oak, with correct routed edges. Tail end of bed wood not routed, nicer installation, we like to set end cap above wood and bed side flange. See also end cap. With hold down bolt holes countersunk for stock mounting or without hold down bolt holes, for hidden underbed mounting. Oversize shipping

- Red oak with mounting holes 0215-WH... \$295.00 set
- Red oak no mounting holes..... 0215-NH... \$275.00 set
- Also available in white oak, call, about \$65 more.
- Exotics, walnut, cherry, etc.....BIG \$\$
