FLOOR DEPRESSION FILLER & INSULATOR

Pour formed for perfect fit. Self adhesive backing. No more old sticky, gummy, gook. Solid, smooth, high tech for a perfect level floor. Made these just because I hate the old sticky stuff and wanted to start with a nice even, flat, smooth, clean surface. Included in the complete floor kit below and the complete insulation kit, also see page 24

FLOOR INSULATION KITS

Kits include all pieces including above poured fillers, dampener kit for under seat and rear floor, high temp adhesive, tape & instructions.

| | | |
|--------------|-----------------|--------------|
| 1953-55..... | 92170-5355..... | \$139.00 kit |
| 1956..... | 92170-56..... | \$139.00 kit |

1. Start with sound dampener kit, self adhesive high density floor depression filler and sound dampener pads go in all indents on floor.
2. Then add precut floor pieces made from aluminum faced heat and sound absorber-barrier material.

Note you simply can NOT over-do the sound dampener, I like to go over the entire area, on top of the kits above with an additional smooth layer. Not necessary but really quiets and helps with cooling in our hot areas. Takes 2 extra rolls to completely "over-do" the cab also see page 25

SOUND DAMPENER
