

# AIR CONDITIONING

Complete inside and under hood kits shown above

## VINTAGE AIR STYLE

Gen II technology, means the unit is smaller but more powerful with servo (electric not vacuum) motors to control all air-flow doors, and bi-level operation, (mixes heat and air for better dehumidified defrost and temperature control). Includes plastic underdash piece for louvers and/or controls.

### INSIDES KIT (EVAPORATOR KIT)

Includes unit & mounting brackets, control switches, wiring, duct hose, drain kit, water valve, reduced glove box and plastic underdash panel.

With rotary switches, for dash or underdash panel
