

HEADLINER

To cover the headliner with material you would need 3 Yards
Panel truck headliner, see page 172

STOCK PANEL-BOARD HEADLINER

Stock headliners are made of stiff panel board, and can be VERY difficult. You are working upside down & backwards, and making a straight piece into a curve so please see our ABS headliners. Oversize shipping

HEADLINER RUBBER RETAINER2112.....\$16.50 ea

Replace this, the newer & softer the easier it is to get the headliner in. We make 196" long to go all the way to floor for a cleaner look, originally, and others on the market are only 178" and did not go to floor but should have. Trim excess, use this with flat "old style" ABS headliners and stock panel-board headliners. If covering headliner, do not overlap material to back side of panel as it will be too thick to go inside rubber, just bring material to edge and trim.

NOTE: molded abs styles do not use retainers and are easiest to install. See next page
