

AIR CONDITIONING KITS

Complete inside and under hood kits shown above

VINTAGE AIR STYLE

Gen II technology, means the unit is smaller but more powerful with servo (electric not vacuum) motors to control all air-flow doors, and bi-level operation, (mixes heat and air for better dehumidified defrost and temperature control). Includes plastic underdash piece for louvers and/or controls.

INSIDES KIT (EVAPORATOR KIT)

Includes unit & mounting brackets, control switches, wiring, duct hose, drain kit, water valve, reduced glove box and plastic underdash panel.

With rotary switches, for dash or underdash panel
