

# HOOD TILT KITS

(CANTILEVERED: means hood is now secured at the other end)

Flipping the hood can solve many a "fit" problem, by sliding hood forward and up gives more access to engine area than before. Also with kit installed hood is adjustable in all four corners for a more uniform and smooth fit.

For both kits listed here, do not use safety latch (the one on pass side) or cowl lacing with any flip style hood kit as they pull forward first, then up, and will catch on cowl lace and latch. Use center latch, adjust striker plate accordingly. Hood alignment rods not needed but fender alignment rods are. Note how hood pulls forward first, this requires a different style hood lace so hood lip will not catch. Use hood bumpers or rubber lacing on hood instead, listed below

## MMB HOOD TILT KIT

*Complete kit, no BMW parts. Very simple to install using stock mounting locations and holes. Safety hood prop mounts down in front for security and complete engine access, plus a neat rubber hood bumper holder. Includes cover plates for original hinge mounting area. This kit is a little easier to install and a little heavier in construction than the other one below.*

MMB hood tilt kits

Plain.....	2030 .....	\$350.00 kit
With polished stainless ramps & prop .....	2030-PBP .....	\$449.00 kit
