1 OF 1

Simple and easy "stuck in the Fifties" brake shoe centering.
(Proper drag & centering)

Starting with new shoes and freshly turned drums,
Adjust shoes until they start dragging.
Give the backing plate a nice whack with a large ball peen hammer.
The shoes should back off and the drag be gone.
Adjust back out a little until wheel rotation stops.
Back the adjuster off 6 clicks.
Should be perfect old fashioned adjustment.
