

GAS SENDER ADAPTER PLATE & GASKETS
MID FIFTY F-100 PARTS 1-800-252-1956

PART NUMBER

1605-ADPT

The hole pattern in this plate and gasket are CORRECT. The holes are not evenly spaced. The sender plate WILL fit the inside ring of holes. JUST KEEP TURNING IT until you locate the correct spot. It will only fit one way. After finding the correct spot, if you need the float arm to point a different direction, loosen the nuts on top of the unit, and turn unit on plate. Make sure to tighten the unit back down correctly. We get calls every day complaining that the sender holes do not match up, THEY DO, it is just one more turn away.
