

BATTERY SPLASH SHIELD 1953-55 GAS TANK SPLASH SHIELD

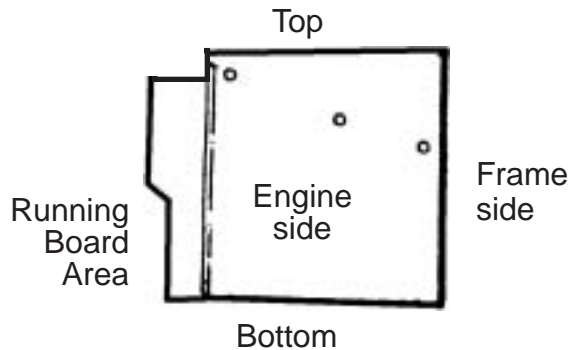

PART NUMBER

1621

0120-PLSS

#@\$!*@#\$\$% INSTRUCTIONS
MID FIFTY F-100 PARTS 1-800-252-1956

Part is shown looking at it from the engine compartment.

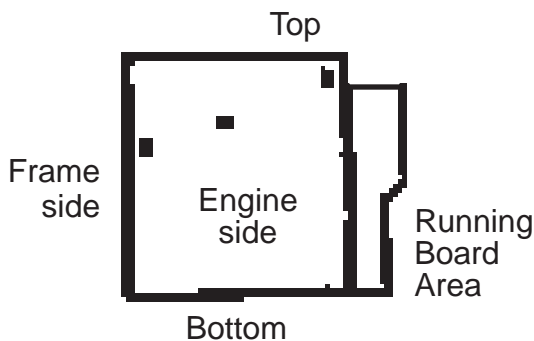

BATTERY TRAY SPLASH SHIELD

Note the position of the cut out edge.

It goes toward the outside, with the cutout near the running board area. The polished side is covered with a white plastic protective coating. The polished side goes toward the engine.

NOTE: If for some reason you would prefer the polished side to show on the "inside", that is, inside the battery compartment, order a Gas Tank Splash Shield for the battery side.

1953-55 GAS TANK SPLASH SHIELD

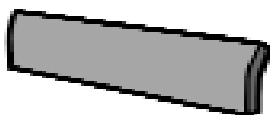

Note the position of the cut out edge.

It goes toward the outside, with the cutout near the running board area. The polished side is covered with a white plastic protective coating. The polished side goes toward the engine. Part shown looking from engine compartment.

The gas tank splash shield was not original.

We have added it to balance out the look, especially if using polished stainless.

Also available is a shield for the bottom of the tank. See our catalog for details

Both sides use the rubber splash shield. #0114

It is installed along the top with small stainless screws.

The original was installed with staples but we prefer not to use them as it is a potential rust problem.

SEE CATALOG FOR OTHER MOUNTING HARDWARE.
