YELLOW	WHITE (LOW)
RED	GREEN (PWR)
BROWN	WASHER
BLACK	GROUND
BLUE	GREY (PARK)

I only stripped this wire to be able to ground the circuit for a bench test. Do NOT use this method during installation.

Run a jumper wire from the ACC post on the back of the ignition switch to the red wire for power.

If you bought our standard wiper motor kit, these items were included with it. **DO NOT** use these parts with the intermittent switch. Plug the wires from the switch directly into the white, plastic housing coming off of the wiper motor.
